PROFESSIONAL PROFILE

Software Engineering student focused on building scalable web applications and microservices. Proficient in Java, Python, and SQL with a strong foundation in Software Architecture, Clean Code, and Agile methodologies. Currently doing an International Exchange in Cergy, France.

PROJECT EXPERIENCE

Data Structures & Algorithms (C). Developed 3 systems to benchmark CRUD performance across 5+ data structures (BST, Linked Lists), analyzing Big O complexity and computational efficiency. **August, 2022**

Database Design & Implementation (Java & MySQL). Engineered a CRUD application with a 3NF normalized database, optimizing performance through complex SQL queries and strategic indexing. **March, 2023**

Appointment Scheduling System (Java & JavaScript). Architected a secure full-stack application using UML modeling and DAO/MVC design patterns to ensure scalable architecture and robust authentication. **October, 2023**

University Council Member. **2024**

Artificial Intelligence (Python). Developed 8 projects covering optimization, ML (regression/classification), and reinforcement learning using Markov Decision Processes and Q-learning. **August, 2024**

Data Science Workshop. Developed an interactive dashboard and analysis tool adopted by 15+ team members to visualize complex datasets and deliver stakeholder insights. **August, 2024**

Software Architecture & Engineering (Go). Architected a modular web application integrating 5+ REST APIs and SOA/MVC principles, focusing on scalability and maintainability through clean code. **March, 2025**

International Exchange - Paris: Currently doing an exchange at ENSEA in France. **2026**

EDUCATION	LANGUAGES
National University of San Luis Software Engineering (2021 - Present). GPA: Current: 8.24 (88.64% of courses approved) - Fifth year. Santa Catalina Institute High School Diploma in Natural Sciences GPA: 9.23 (Flag bearer) International Exchange (January - Present) - ENSEA, Cergy, France.	Spanish - Native. English: - C1.2 English Level. 10+ years of study. - Cultural exchange in Boston (EF Certified).

TECHNICAL SKILLS	SOFT SKILLS
Languages. Java, Python, SQL, Go, C, JavaScript, PHP, Haskell, Assembly, HTML/CSS. Databases & Tools. MySQL, PostgreSQL, Git, Spark, UML, Agile, REST, OOP, Design Patterns.	Analytical problem-solving, technical decision-making, and rapid adaptability to new technologies.
